Welcome to our USA & English Law Advisory Service

Today's globalised business environment poses numerous challenges for any business. One of them is retaining legal representation that is effective and efficient in safeguarding your interests in your cross-border dealings. We are here to help you turn this challenge into an asset by offering accessible legal advice on either USA or English law locally from Athens.

**“The world is your oyster
and we are here to make sure
you find the pearls”**

The Problem

With the United Kingdom and the United States being homes to the most established financial centres of the world, more often than not our clients find themselves to be parties to international contracts and cross-border transactions where the law of England & Wales or the law of any of the United States (let's call them USA & English law for short) is the governing law of the agreement.

For businesses, this translates in having to obtain long distance legal advice from either England or the USA. As a result businesses face the difficult dilemma of either paying the highest fees in the world or compromising with legal advice from legal professionals who neither have the necessary experience nor are they qualified to practice USA or English law.

The Solution

Our USA & English law Solution offers a full range of business - related legal services for clients with cross-border commercial activities within any industry. Our team of English and USA qualified legal professionals is ready to effectively represent you in a wide range of transactions with a USA or English law element, from Athens and at a reasonable cost.

Our Service

Our USA & English law qualified professionals have represented numerous clients in cross-border transactions ranging from contracts governing simple day-to-day dealings, like agreements for the provision of goods & services, confidentiality agreements & memoranda of understanding, to more complex business and financial transactions, such as syndicated financings and security offerings, mergers, disposals & acquisitions, joint ventures & partnership agreements.

Rest assured that we have first-hand knowledge of the realities of international commerce and we offer the tools your business needs for operating internationally without compromises.
